

7.2 Best Practices (2019-20)

1. Title :

Establishment of Cottage Industry in the adopted village

Goal :

To promote the use of bamboo in cottage industry as well as to create eco- friendly job opportunities.

The Context:

Bamboo has been used to establish cottage industry mainly in the bamboo growing area. Charing is heavily dominated by bamboo plantation. These bamboos are mainly used for making hand fans, big baskets, other products related to bamboo handicrafts. The furniture made by bamboo is eco-friendly and used to avoid the things made of plastics. In brief bamboo could be used as an alteration way of eco-friendly job opportunity for the students in particular and the people of the adopted village in general. It is expected that this project will be under the National Bamboo Mission in future.

The Practice

- i. The College has made special provision for the students and the people of the adopted village to establish cottage industry by using bamboo.
- ii. The bamboo art has been given importance through training to the students and village people given by external experts.

2. Title :

Development of Fishery in the College Campus

Goal :

To conserve rare species of fishes in the college fisheries as well as to create job opportunities.

The Context:

Most of the students of the college come from the agricultural background. Most of them owe their profession from agriculture and its related areas. A few of the alumni opts aquaculture as a means of livelihood. In this context, the college authority intends to develop

fisheries in its big campus. The fisheries of the college provide a livelihood to the supporting staff of the college. It also helps the local fisher man for their little earning. Besides the economic benefits, it contributes a healthy environment in the campus. It helps to motivate the young generation towards aquaculture.

The Practice

The fishing sector is one of the emerging sectors of the economy. The college provides its own fisheries to the supporting staff on lease. It is an alternative way of livelihood for them.
